

➤ ABSORBENTS, SPILL KITS, CONTAINMENT

ONE SUPPLIER, ONE MONTHLY INVOICE,
ONE OUTSTANDING SERVICE... FOR ALL
YOUR SPILL CONTROL AND
CONTAINMENT NEEDS

› WHY CHOOSE US?

By choosing us as your service provider, you get expert advice from the supplier that offers the widest range of spill control and cleaning solutions in the UK.

› IMPROVE YOUR ENVIRONMENTAL CREDENTIALS

Used oily absorbents are classed as hazardous waste, so by collecting them for recycling, we can:

- Save you the cost and hassle of disposal
- Reduce the amount of hazardous waste on site
- Improve your environmental profile by recycling
- Help prevent the build-up of waste and keep the workplace clean

We not only supply the products, but also collect used absorbents for recycling and compliant disposal.

We offer the ultimate in spill control solutions with our improved range of performance products which can boost your environmental credentials.

› SERVICE

We have the product range and service packages to ensure you are able to efficiently contain and control leaks and spills.

› COMPREHENSIVE PRODUCT RANGE

Over 900 products to control and clean-up leaks and spills.

› PRODUCT SURVEYS

An assessment of current products and practices used on your site with suggestions of cost-effective alternatives.

› SITE SURVEYS

Our sales representatives are trained to carry out site surveys and advise on the appropriate spill control measures.

› MANAGED SPILL CONTROL SYSTEMS

Independently managed systems can be implemented to simplify the time-consuming task of spill product and Spill Kit monitoring. This provides:

- FREE product dispenser systems
- Regular auditing
- Usage reporting
- Authorised product replenishment

› SPILL TRAINING

Our Area Managers are trained to carry out basic Spill Kit training that fulfills the requirements of ISO 14001 and EA/SEPA & NIEA guidelines. Advanced training sessions can also be supplied.

› COMPLIANCE

Our expert sales representatives are able to offer you guidance to assist you in complying with all of the current environmental regulations.

› OIL STORAGE REGULATIONS

The Control of Pollution (Oil Storage) (England) Regulations 2001
The Water Environment (Oil Storage) (Scotland) Regulations 2006
The Control of Pollution (Oil Storage) (N. Ireland) Regulations 2010
Containers should be stored on secondary containment equipment (bunded Spillpallets). Bunds should be able to contain 110% of the maximum contents of the largest container or 25% of the total volume stored, whichever is the greater.

› POLLUTION PREVENTION GUIDELINES

PPG 2 Above Ground Oil Storage Tanks
PPG 7 Refuelling Facilities
PPG 18 Managing Fire Water and Major Spillages
PPG 21 Pollution Incident Response Planning
PPG 26 The Storage and Handling of Drums and IBC's

› ISO14001

ISO 14001 encourages businesses to have adequate spill protection equipment on hand and to train staff to use it to protect the environment in the event of a spill.

› INTEGRATED POLLUTION PREVENTION AND CONTROL (IPPC)

In order to gain an IPPC permit, operators of industrial sites must show that they have systematically developed proposals to apply the Best Available Techniques (BAT) to pollution prevention and control.

› EXPERTISE

We have a key product range comprising of the most useful and effective spill control products available today ensuring you have the optimum solution for each application.

› ABSORBENTS

Pads, socks and rolls for general purpose, oil, fuel and chemical applications.

› NATURAL FIBRE ABSORBENTS

Pads, rolls and socks made from recycled natural fibres with a reduced environmental impact.

› SPILL KITS

A range of emergency response kits providing the correct level of spill control materials for any situation.

› CONTAINMENT & DRIP TRAYS

Bunded drum and IBC storage solutions and a range of useful drip trays.
